

AMENDMENTS TO THE CLAIMS

Please amend the claims as indicated below.

Claims 1-82 (Cancelled).

83. (New) A method implemented by a television set-top terminal ("STT") comprising the steps of:

providing a list of video presentations that are not currently available for rent via the STT;

receiving viewer input configured to select one of the video presentations from the list of video presentations;

associating the selected video presentation with a reminder list responsive to receiving the viewer input; and

responsive to associating the selected video presentation with the reminder list, providing reminder information to the viewer after the selected video presentation becomes available for rent via the STT, the reminder information being configured to remind the viewer that the selected video presentation has become available for rent via the STT.

84. (New) The method of claim 83, wherein the step of providing reminder information is performed responsive to viewer input requesting access to the reminder list.

85. (New) The method of claim 83, wherein the step of providing reminder information is performed responsive to viewer input requesting access to a list of presentations currently available for rent.

86. (New) The method of claim 83, wherein the step of providing reminder information is performed via a barker.

87. (New) A method implemented by a television set-top terminal ("STT") comprising the steps of:

providing a list of video presentations;
receiving viewer input configured to select one of the video presentations from the list of video presentations;
associating the selected video presentation with a reminder list responsive to receiving the viewer input; and
responsive to associating the selected video presentation with the reminder list, providing reminder information to the viewer, the reminder information being configured to remind the viewer that the selected video presentation will no longer be available for rent via the STT after a predetermined time.

88. (New) The method of claim 87, wherein the step of providing reminder information is performed responsive to viewer input requesting access to the reminder list.

89. (New) The method of claim 87, wherein the step of providing reminder information is performed responsive to viewer input requesting access to a list of presentations currently available for rent.

90. (New) The method of claim 87, wherein the step of providing reminder information is performed via a barker.

91. (New) A method implemented by a television set-top terminal ("STT") comprising the steps of:

providing a list identifying a plurality of video presentation titles;
providing a plurality of icons simultaneously with providing the list identifying the plurality of video presentation titles, wherein the plurality of icons correspond to a plurality of respective video presentation lists;
enabling a viewer to add any one of the plurality of video presentation titles to any one of video presentation lists by visually associating said one of the plurality of video presentation titles with a respective one of the plurality of icons responsive to viewer input provided via a remote control device.

B1 contd

92. (New) The method of claim 91, wherein visually associating said one of the plurality of video presentation titles with said respective one of the plurality of icons comprises providing images simulating dragging said one of the plurality of video presentation titles across a portion of a television display and depositing said one of the plurality of video presentation titles at a location corresponding to said respective one of the plurality of icons.

93. (New) The method of claim 91, further comprising providing one of the plurality of respective video presentation lists to the viewer responsive to viewer input.

94. (New) The method of claim 91, further comprising providing reminder information to the viewer, the reminder information being configured to remind the viewer that a video presentation corresponding to said one of the plurality of video presentation titles has become available for rent via the STT.

95. (New) The method of claim 91, further comprising providing reminder information to the viewer, the reminder information being configured to remind the viewer that a video presentation corresponding to said one of the plurality of video presentation titles will no longer be available for rent via the STT after a predetermined time.

96. (New) A television set-top terminal ("STT") comprising:

memory configured to store program code; and

a processor programmed by the program code to enable the STT to:

associate a video presentation not currently available for rent via the STT with a

reminder list responsive to receiving viewer input; and

provide reminder information to the viewer after the video presentation becomes

available for rent via the STT, the reminder information being configured

to remind the viewer that the video presentation has become available for rent.

97. (New) The STT of claim 96, wherein the processor is programmed by the program code to provide the reminder information responsive to viewer input requesting access to the reminder list.

98. (New) The STT of claim 96, wherein the processor is programmed by the program code to provide the reminder information responsive to viewer input requesting access to a list of presentations currently available for rent.

99. (New) The STT of claim 96, wherein the processor is programmed by the program code to provide the reminder information via a barker.

100. (New) A television set-top terminal ("STT") comprising:
memory configured to store program code; and
a processor programmed by the program code to enable the STT to:
associate a video presentation with a reminder list responsive to receiving viewer
input; and
provide reminder information to the viewer, the reminder information being
configured to remind the viewer that the video presentation will no longer
be available for rent via the STT after a predetermined time.

*cf B1
cont'd*
101. (New) The STT of claim 100, wherein the processor is programmed by the program code to
provide the reminder information responsive to viewer input requesting access to the reminder
list.

102. (New) The STT of claim 100, wherein the processor is programmed by the program code to
provide the reminder information responsive to viewer input requesting access to a list of
presentations currently available for rent.

103. (New) The STT of claim 100, wherein the processor is programmed by the program code to
provide the reminder information via a barker.

104. (New) A television set-top terminal ("STT") comprising:
memory configured to store program code; and
a processor programmed by the program code to enable the STT to:
provide a list identifying a plurality of video presentation titles;
provide a plurality of icons simultaneously with providing the list identifying the
plurality of video presentations, wherein the plurality of icons correspond
to a plurality of respective video presentation lists;
enable a viewer to add any one of the plurality of video presentation titles to any
one of video presentation lists by visually associating said one of the
plurality of video presentation titles with a respective one of the plurality
of icons responsive to viewer input provided via a remote control device.

B' conel
105. (New) The STT of claim 104, wherein the processor is programmed to visually associate
said one of the plurality of video presentation titles with said respective one of the plurality of
icons by providing images simulating dragging said one of the plurality of video presentation
titles across a portion of a television display and depositing said one of the plurality of video
presentation titles at a location corresponding to said respective one of the plurality of icons.

106. (New) The STT of claim 104, wherein the processor is further programmed to provide one
of the plurality of respective video presentation lists to the viewer responsive to viewer input.

107. (New) The STT of claim 104, wherein the processor is further programmed to provide
reminder information to the viewer, the reminder information being configured to remind the
viewer that a video presentation corresponding to said one of the plurality of video presentation
titles has become available for rent via the STT.

108. (New) The STT of claim 104, wherein the processor is further programmed to provide
reminder information to the viewer, the reminder information being configured to remind the
viewer that a video presentation corresponding to said one of the plurality of video presentation
titles will no longer be available for rent via the STT after a predetermined time.
